recycled
paper.

Evolve large format paper.

A brilliantly white, 100% recycled, large format paper that's perfect for Inkjet and PPC applications.

Evolve is made from 100% recovered waste paper and delivers uncompromising print results and environmental performance.

Evolve large format paper

- 100% recycled for Inkjet & PPC applications that is ideal for environmentally aware organisations
- Brilliantly white and beautifully smooth
- Diverts up to 180,000 tonnes of waste paper from UK landfill every year
- Made using a life cycle approach in Europe
- Minimises impact on environment at every stage of production, use and disposal
- Production process uses natural resources eco-efficiently

Frequently Asked Questions

Why should I choose Evolve instead of my existing paper?

Evolve large format paper delivers comparable performance and quality to that of virgin paper as well as excellent environmental credentials.

Recycled paper can sometimes be dull and grey: how bright is Evolve?

Evolve is as bright and white as conventional paper. The high brightness and whiteness is achieved by careful selection of high quality waste paper and a unique production process that uses biodegradable soaps and chlorine-free bleaches.

Recycled papers usually feel rough: how is Evolve different?

Evolve is very smooth and compares favourably with conventional papers. Evolve's high smoothness is an excellent surface for Inkjet (black and colour) inks and significantly reduces the tendency for the paper to curl, particularly relevant to PPC applications.

Is Evolve suitable for archiving purposes?

Yes, Evolve is certified with DIN 6738, the international standard that guarantees paper for archiving.

How is the Evolve production process eco-efficient?

It uses waste paper effectively and helps divert waste from landfill or incineration. Biomass is the predominant energy source and is renewable. Water is re-used and recycled with 95% cleaned and returned to the river system.

What happens to the by-products of the paper-making process?

Between 1000 and 2000 tonnes of sludge are treated each week. This sludge is either used by local farmers as soil conditioner or used to generate energy.

Is Evolve produced in a mill that has environmental accreditations?

Yes. Evolve is produced in a mill that is accredited with ISO 14001, the international standard for environmental management. This means the mill has regular, independent audits to ensure its environmental management systems are up to standard.

Evolve
RECYCLED. NO COMPROMISE.

Evolve Inkjet

100% Recycled Inkjet Paper – 80gsm and 90gsm

Description:

Bright white, super smooth, 100% recycled paper for Inkjet applications. This medium weight, uncoated paper is an excellent alternative to conventional papers for environmentally aware organisations.

Applications:

- CAD work
- Presentations
- GIS/mapping

Roll specifications:

Weight: 80gsm, 90gsm

Length: 45m, 90m **Core:** 52mm

Widths: 610mm, 841mm, 914mm

Evolve at a glance

100% recycled with no compromises.

Whiteness:

Bright white for excellent contrast and outstanding print results. This is a 100% recycled paper with a difference... not grainy, dull or grey, but a beautifully white stock that performs as well as conventional papers.

Print quality:

A trustworthy and reliable performer with excellent sharpness and consistency.

Smoothness:

Evolve's excellent smoothness gives an ideal surface for Inkjet (black and colour) inks and reduces curl in PPC applications.

Evolve PPC

100% Recycled Plain Paper Copier – 80gsm

Description:

A high grade, bright white, 100% recycled paper that is perfect for Plain Paper Copier applications. It gives superb quality with no compromise on brightness or smoothness. It's an excellent choice for organisations looking to improve their sustainability and environmental performance.

Applications:

- Multiple use copying
- Plan printing

Roll specifications:

Weight: 80gsm

Length: 150m, 175m **Core:** 76mm

Widths: 420mm, 594mm, 841mm,

Available as cut sheets:

A0	1189mm x 841mm	pack quantity 125 sheets
A1	841mm x 594mm	pack quantity 250 sheets

Longevity:

Guaranteed for archiving purposes with DIN 6738 accreditation.

Runability:

Dust-free and is consistently smooth for jam-free performance.

Environmental benefits:

- 100% recycled paper made using genuine UK recovered paper
- Helps reduce waste by diverting 180,000 tonnes of waste from UK landfill each year
- Uses mainly biomass energy
- Uses and re-uses water efficiently with 95% returned clean to the river
- Uses only biodegradable soaps and chlorine-free bleaches
- Ensures by-products are used eco-efficiently
- Made in a mill accredited with ISO 14001
